Professional Summary

Electrical and Communication Engineer with strong experience in telecom (Ericsson, 5G, RAN, TRM) and a solid background in programming, automation, and web development.

Skilled in Python, JavaScript, VBA, and modern web technologies, with proven ability to develop automation tools that significantly reduce execution time and improve efficiency.

Developed and deployed multiple websites (5+ projects), demonstrating strong front-end and problem-solving skills.

Currently seeking opportunities in Software Development, Web Development, Data Analysis, and Freelancing (Automation & Scripting), Open to remote and freelance opportunities.

Technical Skills

Programming, Web & AI Technologies:

- Python (Automation, Data Analysis, Scripting)
- VBA (Excel Automation & Tools Development)
- HTML & CSS (Responsive Websites, UI Design)
- JavaScript (Web Development)
- React.js
- Bootstrap
- Tailwind and many other libraries for frontend designs
- Generative AI (Prompt Engineering, AI Tools Integration)

Data & Tools:

- Excel (Advanced)
- Power BI
- SQL (Basic)
- Tableau

Professional & Technical Tools:

- Microsoft Office 365 (Excel, PowerPoint, Word, Outlook)
- Microsoft Teams (Collaboration & Communication)
- MoPs Preparation (Method of Procedure Documentation)
- Technical Presentations & Reporting

Other Skills:

- Automation & Scripting
 - Linux Basics
 - Networking (CCNA Level)
 - Telecom Systems (Ericsson, 5G, RAN, TRM)
-

Projects

Automation Tools for Telecom Scripts

- Developed automation tools using Python, JavaScript, and VBA
- Reduced script generation time from over 1 hour to less than 2 minutes
- Improved team productivity and reduced manual effort by over 90%

Quality Check Unification Tool | Excel VBA, Advanced Excel

- Developed an Excel VBA-based tool to standardize quality-check procedures across multiple accounts
- Unified the review workflow for a 20-member technical team and improved task consistency
- Reduced process confusion, minimized manual errors, and improved reporting accuracy

Task Distribution & Utilization Dashboards | Excel, Power BI

- Created Excel and Power BI dashboards to monitor task distribution and team utilization
- Tracked incoming tasks, workload balance, and daily productivity across a 20-member team
- Improved visibility of team performance and supported better operational decision-making

Telecom Supply Hub | JavaScript, HTML5, CSS3, React.js, Vite, Tailwind CSS

- Developed a responsive telecom e-commerce platform for contractors and field teams
- Built product categories, filtering, shopping cart, checkout flow, pagination, and mobile-friendly pages
- Improved user experience by creating a clean, organized, and responsive interface for telecom products

Telecom Training Platform | React.js, Vite, Tailwind CSS, Bootstrap

- Built a responsive telecom training and onboarding platform for learning and course management
- Developed course catalog, search, pagination, course levels, course details, and KPI dashboard sections

- Enhanced usability with a modern interface, responsive layout, and light/dark theme support

Telecom Network Operations Dashboard | React.js, Vite, JavaScript

- Created a telecom NOC/RAN operations dashboard for monitoring network sites, alarms, KPIs, and SLA status
- Added features for troubleshooting actions, CSV import/export, PDF printing, routing, settings, and responsive views
- Supported operational monitoring across 2G, 3G, 4G, and 5G network environments

KUDZOKA Landing Page | HTML5, CSS3, Bootstrap

- Designed and developed a modern responsive landing page for business or startup presentation
- Built responsive navigation, interactive sections, smooth animations, and mobile-optimized layouts
- Improved visual presentation through clean UI design, organized structure, and user-friendly layout

Criativo Creative Agency Website | HTML5, CSS3, Bootstrap

- Developed a responsive dark-themed website for a creative agency or digital services brand
- Built service cards, portfolio gallery, project showcase, team section, testimonials, blog cards, and contact form
- Enhanced the website's visual appeal using modern animations, structured sections, and responsive design

Metal Detection System using GPS

- Designed embedded system using microcontroller and GPS
- Transmits coordinates to control unit for tracking metal locations
- Used in hazardous environments and detection systems

Work Experience

Technical Experience (12+ Years):

Solid background in telecom engineering, network operations, and technical support across multiple companies in Egypt and various African and Arab countries (including South Africa and Saudi Arabia), working both remotely and on-site, combined with hands-on experience in automation, scripting, and developing tools to improve efficiency and reduce manual work.

Education

Bachelor of Electrical Engineering - Communication & Electronics
Benha University - 2010

Professional Memberships:

- Egyptian Engineers Syndicate
 - Arab Engineers Federation
-

Certifications

- The Higher Diploma in Technology from Benha University
 - Certificate of experience in the field of operation, maintenance and repair of equipment and electrical devices from the Egyptian armed forces
 - Data Analysis (Python, SQL, Power BI, Tableau)
 - Many courses on generative AI and AI and ML and many others
 - Mobile Networks (GSM, GPRS, EDGE, CDMA, UMTS, HSPA, LTE, LTE-A, LTE-A Pro, 5G)
 - Business Model Innovation, Differentiate & Grow Your Company
 - ICDL Certification
-

Languages

- Arabic: Native
- English: Fluency (Spoken & Written)
- French: Elementary
